

Instructions for assembling Prayer Beads

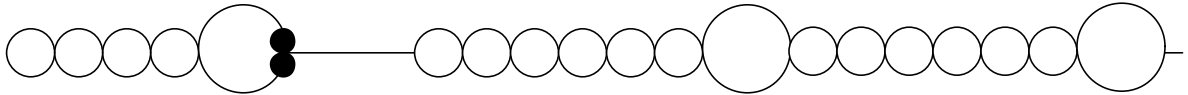

1. The hemp cord was prepared earlier by cutting it into 2 foot lengths and brushing the ends with clear nail varnish to prevent fraying.
2. String the Cross on a loop of hemp cord, securing the loop above the cross with a tight square knot.

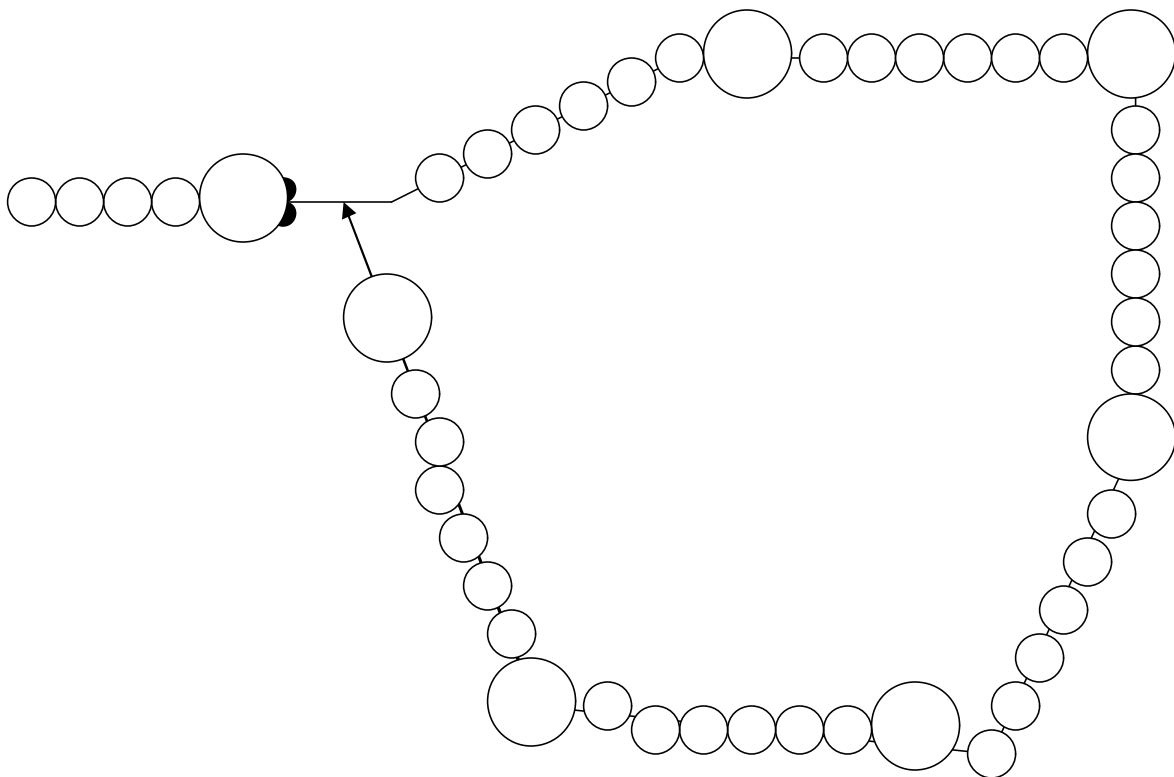

3. String four small beads and one large bead above the cross.

4. Knot the hemp cord above the large bead to keep these beads in place.
5. String the remaining beads in a sequence of six small beads and one large bead until there are six complete sets on the cord.

6. Leave some slack in the cord, allowing the beads to slide up so the end of the cord can be tied off below the six sets of beads and above the knot holding the original five beads in place.

7. Secure the knot tightly, and then dab tacky glue on all of the knots to harden them.
8. Allow the glue to dry.
